📍 Gwalior, MP, India ✉ msb10102005@gmail.com ☎ +91 7828628592 📠 mahendra-baghel-665989249 🌐 [mahendrabaghe](#)

SUMMARY

I am an ML & Data Science and Data Analytics enthusiast with hands-on experience in Python, SQL, Machine Learning, Deep Learning, and Data Visualization. I enjoy transforming raw data into meaningful insights and building practical, data-driven solutions. My technical skills include Pandas, NumPy, Matplotlib, Seaborn, TensorFlow, PyTorch, MySQL, and MongoDB. I have worked on projects involving data analysis, sentiment analysis, speech emotion recognition, and machine learning, and I am continuously improving my skills in AI, analytics, and Generative AI. 📁

EXPERIENCE

AI/ML Intern- India Edu Program

Google for developer

July 2024 - September 2024,

- Implemented ML models using Scikit-Learn, Pandas, NumPy.
- Built projects like house price prediction.
- Explored supervised and unsupervised learning in Google Colab.

SparkED Data Analytics Intern

Alteryx

April 2024 - June 2026,

- Built ETL workflows in Alteryx Designer for data cleaning, transformation, and reporting automation.
- Automated recurring data validation processes using Alteryx macros, streamlining cross-departmental reporting.
- Devised robust data parsing routines within Alteryx Designer to standardize disparate data sets.

PROJECT

Sentiment analysis

INDIA • github.com/mahendrabaghe

- BART model used to generate summaries of conversational text from SAMsum dataset, aiming to enhance the efficiency and accuracy.
- Performed tokenization, text normalization on the dataset to ensure compatibility with the model.
- Engineered a sentiment analysis pipeline leveraging advanced natural language processing techniques to accurately classify.

Sign language translator

INDIA • github.com/mahendrabaghe

- Engineered a sign language translation system leveraging real-time video processing.
- The sign language translator, significantly broadening accessibility for diverse user groups.

Heart Disease Analysis

INDIA • github.com/mahendrabaghe

- Developed a classification model to predict heart disease using Logistic Regression and Random Forest.
- Performed EDA to identify key risk factors such as age, cholesterol, and chest pain type.

Portfolio Project (Data Analytic)

INDIA • github.com/mahendrabaghe

- Connect the SQL database to Python using sqlite3 and Pandas.
- Developed an interactive Power BI dashboard featuring revenue, profit, sales growth, customer, and product KPIs..

EDUCATION

B.Tech in Computer Science Engineering

ITM University • Gwalior, MP • 2026 • CGPA: 8.2

Senior Secondary (PCM)

New Millenium school • MP • 2022 • Percentage: 84.3%

SKILLS

Languages: Python, C.

ML & Data Science: PyTorch, TensorFlow, Scikit-learn, Pandas, Numpy,

Deep learning: RNN, CNN, LSTM, BERT, (seaborn, opencv).

Databases: MySQL, MongoDB.

Data Analytics: Excel, SQL, power BI.
